

It is unfair to remove the CW subbands due to the fact that a few people are against CW. The opinion of a few shouldn't effect the many. They should have the option to get on HF without having to do code but that shouldn't delete CW as a mode. We deserve a place to use our modes as well. Listen during a contest the CW subbands are rocking. If you remove them I hope you think of all the people that could be saved in an emergency when the solar cycle goes down.
